

## INCIDENT MANAGEMENT SITUATION REPORT

TUESDAY, JULY 7, 1998 - 0530 MDT

NATIONAL PREPAREDNESS LEVEL IV

### CURRENT SITUATION:

Large fire activity continued in the Southern Area. Good progress was made on fires in Alaska and the Eastern Great Basin Areas. New large fires were reported in the Southwest Area. Increased fire activity occurred in the Northwest Area. The National Interagency Coordination Center processed orders for a Type I Incident Management Team, equipment, engines, aircraft, crews and miscellaneous overhead for the Southern Area. Radios, a caterer and shower were mobilized for the Southwest Area. Miscellaneous overhead and 3 crews were ordered by the Northwest Area. Very high and extreme fire indices were reported in Florida, Georgia, Texas, Oklahoma, New Mexico, Arizona, Colorado, Kansas, Utah, California and Nevada.

In Alabama, a Alabama State Forestry Commission employee died of an apparent heart attack while constructing fireline.

### SOUTHERN AREA LARGE FIRES:

FLAGLER/ST. JOHNS COMPLEX, Florida State, Flagler and St. Johns Counties. This complex is under Unified Command with a Type I Incident Management Team (Hutchinson). The evacuation order for Flagler County was lifted yesterday and residents have returned. Containment and mop-up efforts are focused on the continuing threats to residential areas. Weather conditions are favorable and burn-out operations will continue.

ORLANDO COMPLEX, Florida State, Brevard, Orange, Osceola and Seminole Counties. A Type I Incident Management Team (Birch) is assigned. The Farmton fire continues to threaten structures and businesses near Interstate 95. Low relative humidity and live fuel moisture, high temperatures and unpredictable winds continue to pose control problems.

VOLUSIA COMPLEX, Florida State, Volusia County. A Type II Incident Management Team (Kearney) is assigned. Unified Command is in effect with Florida State. The Lafayette fire increased 1,500 acres. Three fires in the complex are now being managed under the Orlando Complex.

CHIPOLA COMPLEX, Florida State, Bay County. This complex is located three miles north of Panama City. Some residences were evacuated as the fire moved in and around structures. No structures were reported lost. Control problems are extensive spotting in dry swamp fuels. State Route 77 was closed due to smoke.

JACKSONVILLE COMPLEX 2, Florida State, Nassau, Duval and Clay Counties. A Type I Incident Management Team (Monahan) is assigned. This fire is being managed under Unified Command. Acreage increase is due to better mapping. No other information was reported.

SUWANNEE COMPLEX, Florida State, Columbia, Union, Bradford and Baker Counties. A Type I Incident Management Team (Wands) is assigned. Unified Command is in effect with Florida State. The largest uncontained fire in the complex is 15 acres. Scattered precipitation was received on the fire. A feller/buncher operation in a burned area resulted in a new fire which briefly threatened a log deck. Aggressive initial attack kept damage to a minimum.

WITHLACOOCHEE, Florida State, Hernando, Pasco, Lake Sumter and Citrus Counties. A Type II Incident Management Team (Kennedy) is assigned. The well that was drilled has not proved to be a reliable water source.

OAK HEAD COMPLEX, Osceola National Forest. A Type I Incident Management Team (Greenhoe) is assigned. These fires are 20 miles north of Lake City. Crews continue to mop-up in the Big Gum Swamp Wilderness.

MERRITT ISLAND COMPLEX, Merritt Island NWR. This fire is in Brevard County at the Kennedy Space Center. Mop-up efforts are continuing to reduce smoke along Highway 50.

ALASKA LARGE FIRES:

MIDWAY, Alaska State. This fire is on the north side of the Alaska Highway between Tok and Northway. Crews completed a burnout along the Alaska Highway. Crews used direct attack and were successful in suppressing numerous spot fires.

CARLA LAKE, Fort Greely Army Base. A Type II Incident Management Team (Swaim) is assigned. This fire is 15 miles southwest of Delta Junction. Slightly cooler temperatures and higher relative humidities have aided suppression efforts. Crews completed securing the entire perimeter edge in one division.

SOUTHWEST LARGE FIRE:

SOUTH DIKE, Havasu NWR. This human caused fire is burning ten miles south of Needles, CA. The fire is burning in salt cedar, tamarisk and brush. Winds and inaccessibility are primary control problems. Southwest Willow Flycatcher habitat and refuge farm buildings are threatened.

**OUTLOOK:**

Florida and southern Georgia will be partly cloudy and hot with scattered thunderstorms. High temperatures will be in the 90's.

Southern Nevada, Utah, Arizona, New Mexico and western Texas will be partly cloudy with scattered thunderstorms. High temperatures will range from the upper 70's in the mountains to 108 in the valleys and deserts.

Alaska will be mostly cloudy with a chance of showers. Coastal temperatures will be in the 50's with interior highs up to 70.

Colorado will be mostly cloudy in the mountains. Southern Colorado will have scattered showers and thunderstorms. Northern and eastern Colorado will have widely scattered afternoon thunderstorms. Temperatures will be in the 70's and low 80's in the mountains and 85 to 95 elsewhere.
